Professional Experience

Php Developer

During my internship at the Académie d'Éducation, I worked on integrating RESTful APIs to build a dynamic, full-stack web application. I used React and Redux for the front-end and PHP with MySQL for the back-end, ensuring a seamless user experience and efficient data handling. I collaborated with the team to maintain high code quality through regular reviews and feature implementation.

Projects

Safar-With-use

.SafarWithus is a travel platform built with React and Laravel, offering personalized recommendations and essential travel information for an intuitive user experience.
vite, tailwind, RactApi
